

PARK

"Activate the Space"

Presque Isle Park Project

Our mission is to create a multigenerational play and education space, by using natural and local materials within current landscape features. Our committee is motivated to incorporate the following features into the developing park:

1

Megaphone

Megaphone for amplification of nature and bird calls. Including educational signage to identify common birds/trees/etc in Presque Isle.

2

Playground

Working with landscape architects, we hope to use natural and sustainable materials to develop a climbing structure, boulder maze, and/or obstacle course.

3

Art and Music

We are hopeful to include community art pieces, in the form of sculpture, wood working, natural music equipment, and/or painted rocks.

4

Environment

We have every intention of preserving the natural landscape of the space. This means, cutting only undergrowth for our paths, leaving mature trees, and cultivating wildflower growth in a current meadow. Parking will be used in an old baseball field already on site.

5

Other

Other community considerations may include a dog park.

We always appreciate your feedback and suggestions.

These pictures were chosen as inspiration of our vision. They do not depict the decisions made by this committee at this time, and are only meant to serve as a visual to display our intentions.
